

Video Security Group DS-0800 Casino Quality Redundant Storage DVR

The DS-0800 is an affordable DVR that allows for Real-Time viewing and CIF recording.

It features "Loop-Through" Video channels which allows it to be used as a "Redundant Storage DVR". This feature is extremely useful so the primary DVR can be set to Motion Detection, while the "Redundant DVR" can be set to 24 hour recording.

It is accessible using a LAN or the Internet, and features Remote view, Remote playback, and Remote Download.

For Purchase Locations, contact us at Sales@IntelDVR.com
